

Accordions

TREBLE & BASS REGISTERS FOR THE NEXT DECADE

When a player first discovers the feather light touch of our register switches and precise action of the keyboard, they feel the quality that Suzuki builds into every instrument. When they hear the rich depth of the bass notes and the delicacy of the treble range it takes little convincing that this is no ordinary Accordion. It has taken years of experience to develop our instruments into this new level of sound quality that truly fits the year 2000 onwards in every aspect.
