

As well as our existing range of unique musical instruments, we are also developing other high quality products and accessories. For instance, the MT-1L Music Stand incorporates several excellent features, to suit your students requirements. The top has a cushion material covering, ideal for mute play of Tonechimes. There are three adjustable heights and the top and base of the stand are detachable for easier storage.

Music Pads are ideal for beginners, each pad being classified by color with the enjoyment of note activation by touch, using our Forte reed technique.

Our technology is used in all our products to make music more accessible and to enhance your playing pleasure.
