

SUZUKI TECHNOLOGY BRINGS THE HARMONICA OUT OF THE 1800'S
 If the best thing you can say about your old harmonica is that it's old, Suzuki presents an exciting new alternative. Our new line of harmonicas feature technological and design innovations never before available, giving you a whole new world of musical expression.

SO MANY FEATURES MAKE THEM SO EASY TO PLAY!

Suzuki harmonicas are designed from the player's point of view. Unique laser tuned reeds not only produce perfect intonation and the widest choice of sound timbres, but are exceptionally easy to play. The highest quality materials, including machined alloy bodies (selected models) control expansion from heat and moisture. You'll notice superb sound amplification and even feel the comfort of our specially contoured casings. We've gone so far as to offer some models in Low F and High G keys to give the pop and blues player new ways to blow the blues!

H A R M O N I C A S
